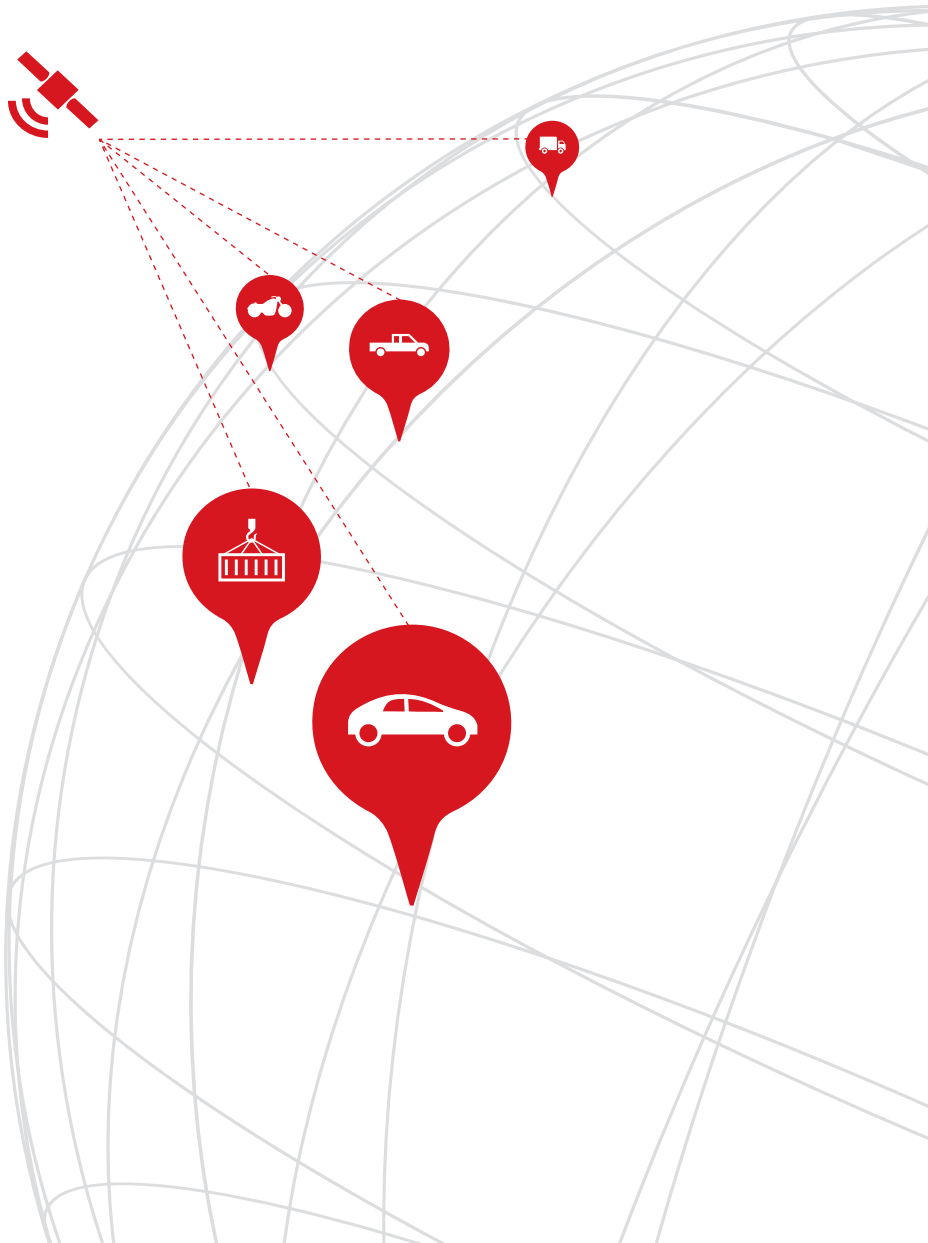
PROCON TELEMATICS

Enterprise M2M Solutions

Fast, Flexible, Cost Effective



The Procon Difference

Procon provides M2M platforms and applications for the management of all mobile assets.
We are an Australian owned company with a strong regional and international presence.
Our customers include GE Corporation, AVIS, Transport for NSW, Toll Holdings, FleetPartners etc.

1 Flexible Enterprise Solutions

We recognise no two companies are the same

Whether you have a few assets or a few thousand, we deliver unprecedented visibility into those assets giving you the actionable intelligence you need to capture opportunities, curb costs, influence behaviour and increase your profits.

Our technology and development team allows us to deliver robust, flexible, scalable solutions based on your goals and budget, allowing you to generate savings and Return on Investment.

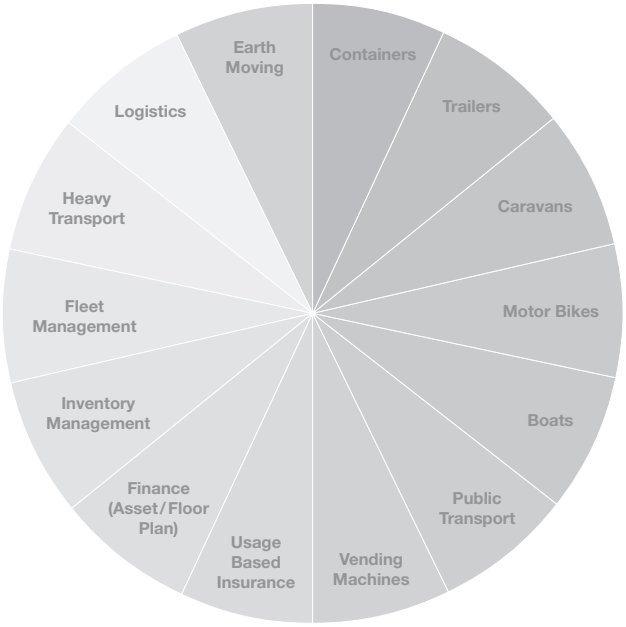
Our service comes with a team of experts who collaborate with you to understand your business and provide:

- Needs assessment and evaluation
- Customisation and integration
- Proactive account management
- Assistance with data interpretation
- Ongoing training and technical support

2 All-in-One

One Platform For All Mobile Assets

Our technology is ideal for companies across all industries looking for one platform to manage all mobile assets.



3 Packs a Punch

Enterprise Grade Platforms

We offer powerful, intuitive, cloud hosted platforms and applications, with processing speeds of >100 thousand transactions per second and tested to > 12 million assets.

Enterprise grade APIs allow for the import and export of large data sets to maximise efficiency and integrate with your existing systems. Unlimited licenses allow for multiple users.

4 Market Leading Prices

Cost Effective

Our purchasing power and speed to market enables us to deliver superior solutions at lower prices.

The Procon Difference

Work Smart

5

Actionable Intelligence

Our institutional knowledge and data analysis service provides actionable data, tracks outcomes and allows for more effective planning. We focus on key areas in which clients can achieve immediate savings; improved utilisation levels, fuel card protection, better driver performance, maintenance scheduling and reduced FBT liability through digital logbooks.

Our service can also be configured to send weekly reports to time-poor executives and generate real time alerts when KPIs are broken (e.g. if speed exceeds 110 kms for > 1 minute or if vehicle is involved in an accident).

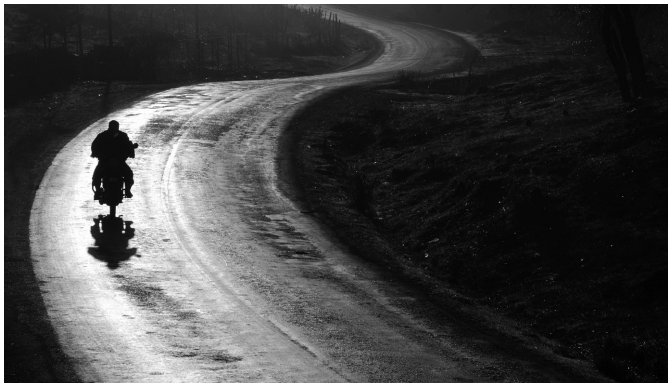
Accessible

6

Mobile Device Applications

Our Easy2Log App allows drivers to enter trip purpose and notes in real time, via smartphones and tablets, facilitating ATO approved digital logbooks.

Our FleetLocate App enables access to our fleet management information via smartphones and tablets.

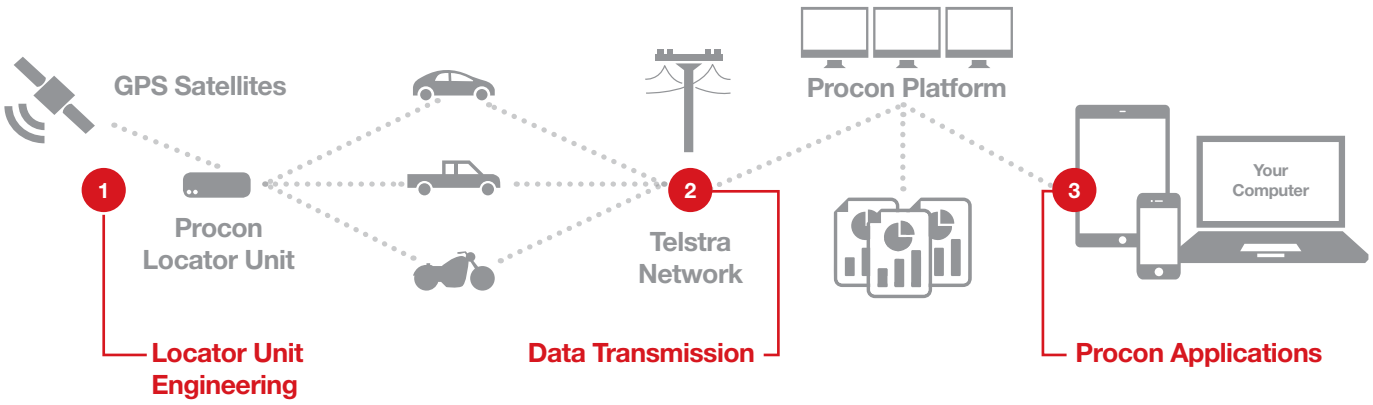


Our Technology

We are able to offer flexible solutions as our system encompasses the entire end-to-end process:

- We select and engineer 'GPS Locator Units' to collect the correct data depending on the asset type
- Our M2M application platform receives and processes the data
- Our applications (Software-as-a-Service) allow you to view your assets and various reports

How It Works



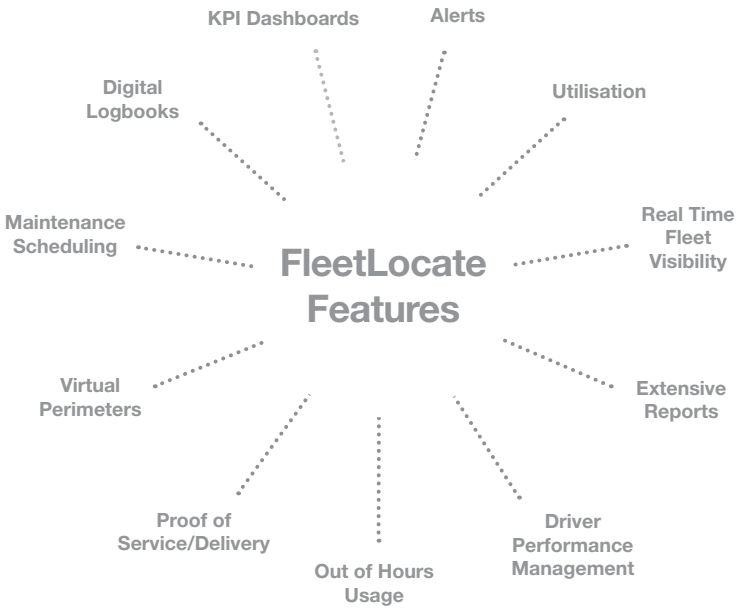
A small locator unit is installed in an asset. This device houses a GPS chip, antenna, SIM card and wireless circuitry. Using the Telstra wireless network, the unit sends data from the asset to our cloud based Platform. Metrics include; GPS coordinates, direction, speed, driving style, current odometer value and other customised information.

Customers gain web-based access to this data via our FleetLocate software; a feature rich, intuitive, service that offers advanced mobile asset management and reporting capabilities.

PROCON TELEMATICS

Market Leading Features

FleetLocate is our flagship asset management application, providing web-based tools for the management of all mobile assets.

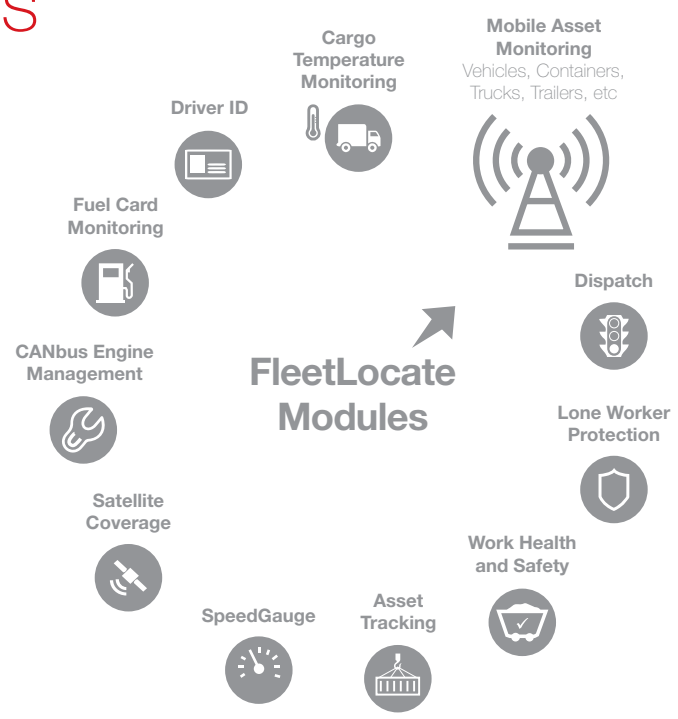


Easy Installation
FleetLocate can be run by simply plugging a locator unit into the OBDII port, located on the steering column of all modern cars. Installing these units takes less than a minute including verification.

FleetLocate
Leading Business Intelligence

FleetLocate Modules

FleetLocate is a scalable service that you can build on by adding Modules as required, so you only pay for what you need.



Installation
FleetLocate modules require locator units with constant power which can be installed in less than an hour.

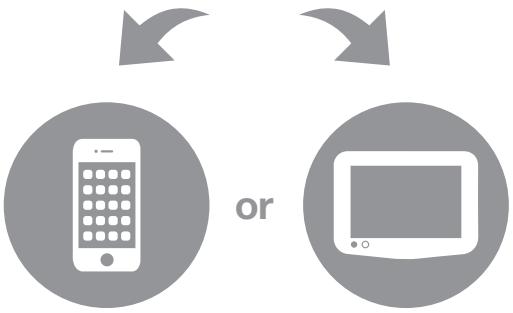
FleetLocate
Leading Business Intelligence

PROCON TELEMATICS

ATO Approved Digital Logbooks

Easy2Log is our free App that enables drivers to input trip purpose & notes via smartphones and tablets. This information is paired with other trip data in FleetLocate, to produce digital FBT logbooks in ATO approved format. Alternatively, drivers can enter trip purpose/notes via an in-vehicle Garmin GPS.

Log Trip Purpose on:

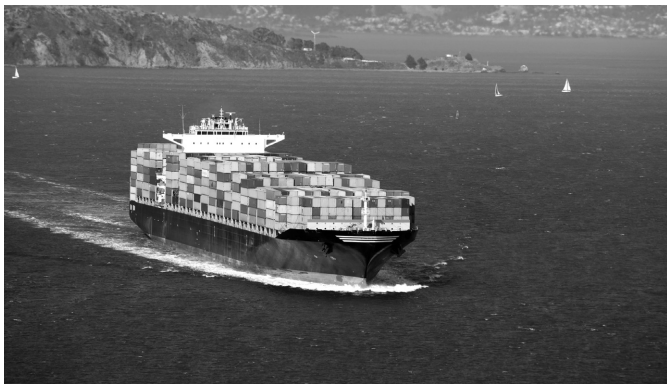


Free App for Smartphones & Tablets

or

Integrated Garmin GPS Navigation

Easy2Log



Locate Thousands in Savings

Reduce Fuel Consumption

1

Independent studies have found that M2M can reduce your fuel bill by up to 30%.

Fuel consumption is closely related to factors like speeding, harsh acceleration & braking, vehicle type, traffic conditions and mileage. Our software allows you to:

- Compare driving styles
- Monitor out-of-hours usage
- Dispatch nearest vehicle for service calls
- Optimise routing and driver efficiency using our dispatch functionality
- Modify driver habits like speeding

FBT Savings

2

A Business with 'Tool of Trade' Vehicles can save an average of $900 a year by using the digital logbook method to calculate FBT liability.

Procon's digital logbook solutions automate this process and improve data integrity.

Improve Driver Behaviour

3

A recent study of 4,000 Procon equipped vehicles found that serious speed violations reduced by an average of 40%. Our Driver ID solution allows easy identification of the driver at the time of a traffic camera infringement. This reduces the cost of handling infringement notices and potential fines for inability to nominate vehicle driver.

Efficient Management

4

- Automated maintenance scheduling
- Find your trailers and other mobile assets
- Increase the utilisation of mobile assets
- Theft protection
- Control unauthorised asset usage

Enhanced Productivity

5

- Improvement in scheduling and dispatching of work crews
- Faster loading and unloading turnarounds
- Faster response times
- Proof of customer service and record of time spent at each destination
- Improved billing systems
- Automation of manual tasks

Product

Software as a Service

Software	Features	Reports
FleetLocate (1 minute Polling) [1]	Live asset status, reports, virtual boundaries, landmarks, history replay, standard 60 second polling, digital logbooks, maintenance schedules	Utilisation, detailed trip, landmark circulation, driver behaviour (harsh brake, speed, acceleration, cornering), logbook
FleetLocate (24 hour Polling) [1]	Once daily asset location + locate on demand	Daily inventory report
+ Fleet Module	**Features**	**Reports**
Driver ID	Enter driver ID by tag or smartphone	Driver identified on reports
Dispatch	Send drivers jobs in real-time	Job report
Lone Worker Protection	In-vehicle alert button and/or 'wearable pendant'	Back-to-base' alert
FuelGuard	Compares fuel card use with vehicle location	Fuel report
SpeedGauge	Monitors speeding within posted speed zones	Posted speed report
Work Health and Safety	Includes 'SpeedGuage', 'Lone Worker Protection' and additional features such as crash detection, fatigue monitoring (logs if a driver exceeds 2 hours without a break and stops for less than 15 minutes), 4WD and seat belt engaged registration	Posted speed report, incidents report (fatigue, 4WD, seat-belt) and 'back-to-base' alerts for crash and lone worker
+ Transport Module	**Features**	**Reports**
Engine Management	CANbus information recorded	Engine management report
Temperature Management	Temperature of cargo monitored	Temperature report
+ Satellite Module	**Features**	**Reports**
Satellite Coverage	Monitors assets when outside Next G coverage	

Hardware

Locator Units	Description	Hardware
FleetLocate	Next G 'plug and play' device	NGPP3030
FleetLocate	Next G powered device	NG2100
FleetLocate	Next G powered device (for powered assets i.e trailers) [2]	NGAT412
FleetLocate (24 Hour Polling)	Next G powered device (for non-powered assets) battery life c. 3 years [3]	NBAT700
FleetLocate + Fleet	Next G powered device including back-up battery	NG2500B
FleetLocate + Transport	Next G powered device including high gain antenna	NG2000
FleetLocate + Satellite	Next G and SAT powered device including high gain antenna	NG3000
+ Accessories	**Description**	**Hardware**
Driver ID	Allows the driver to register usage by swiping a tag before starting a trip. Driver is alerted by a buzzer to swipe	I-button reader / swipe tag / audible buzzer
Garmin	Supports in-vehicle digital logbooks, navigation and dispatch	Nuvi 2597 LMT (Life Maps and Traffic) 5 Inch screen and FMI cable
Temperature Management	Monitors cargo temperature	Temperature probe "3 inch"
Engine Management	Records CANbus engine management data	CANbus pack
Lone Worker Button	Emergency in-vehicle distress button. When pressed an alert is sent to a designated emergency response centre	Push button
Lone Worker Pendant	Emergency wearable pendant with a tilt sensor. When pressed an alert is sent to a designated emergency response centre	On person pendant / receiver
Work Health and Saftey	Includes 'Lone Worker Button' and additional in-vehicle buzzer for audible alerts when speed and fatigue thresholds are breached	Push button & in-vehicle buzzer

[1] Note: A Poll is the interval at which a Locator Unit sends data to the Procon Platform
[2] A flexible solar panel can be fitted for continuous Power
[3] With 24 hr polling

What Happens When You Engage Procon?

- Needs assessment and evaluation
- Pricing proposal
- Installation (nationwide — we come to you)
- Help desk during business hours (9am to 5pm, Monday–Friday)
- Dedicated support team
